# Connectivity Solutions

BringCom is a service provider offering secure and cost-effective connectivity solutions to commercial and government customers in North America, Europe, Middle East and Africa. BringCom delivers reliable end-to-end MPLS, Ethernet, IPLC and IP services at competitive rates. BringCom has rolled out Pan-African MPLS and Ethernet networks connecting customers to PoPs in Europe, the United States and Asia. BringCom is offering two standardized Carrier-class Ethernet services types, as defined by MEF, the defining body for Carrier Ethernet: E-Line and E-Access. BringCom connectivity solutions deliver flexible and customizable, any-to-any networks to connect office headquarters, branches, data centers and other locations, integrating all business traffic applications (voice, data, video and Internet) into one network. With BringCom network services, customers reduce costs and simplify operations to meet the demands of today's business environment. BringCom offers a complete suite of managed enterprise connectivity solutions including access, equipment procurement and configuration, activation, monitoring, maintenance and consolidated billing.
