

Financial Industry Communications Solutions

In today's rapidly evolving financial industry, providing reliable and secure ways to inter-connect local branches with corporate headquarters, financial institutions, insurance companies, data centers and customers is more crucial than ever. BringCom's proposes banking and financial communications solutions in a cost-efficient manner to achieve:

- Reliability
- Scalability
- Service management
- Quality of service
- Security
- Redundancy/Recovery
- Greater operational efficiency
- Delivery of non-stop data
- Faster transaction speeds
- Drive online services
- Improved customer satisfaction and relationships

BringCom's communications solutions meet the networking needs of the financial sector by supporting real-time business critical applications; from cloud-based services, ATMs, credit cards services, branch bank automation, secure financial transactions, electronic transfers, online banking, micro-finance, mobile money services, smartphone mobile transactions, SMS, contactless digital wallets, point of sales systems, file/software updates, standard office systems, multimedia distribution, remote video employee training to internet access; and respond to the competitive, regulatory and demographics changes. Our solutions can extend access to the unbanked population. At BringCom, we can design, implement and maintain secure effective communications networks.

Wireline Connectivity

- **High Speed Fiber Optic Cables**
 - Metro, regional and international connectivity
 - Fiber optic cabling used above ground and below ground and at sea
 - Low latency (99.999 percent)
- **Ethernet Services (standardized carrier-grade; CE 2.0 MEF Certified)**
 - E-Line Services
 - Ethernet Private Line (EPL)
 - Ethernet Virtual Private Line (EVPL)
 - Ethernet Internet Access
 - BringCom hubs in London, Djibouti, Nairobi
 - E-Access Services
 - Wholesale Access Services
 - Access EPL
 - Access EVPL
 - BringCom hubs in London, Djibouti, Nairobi and Kampala
- **MPLS IP VPN services**
 - Dedicated MPLS connectivity to global POPs

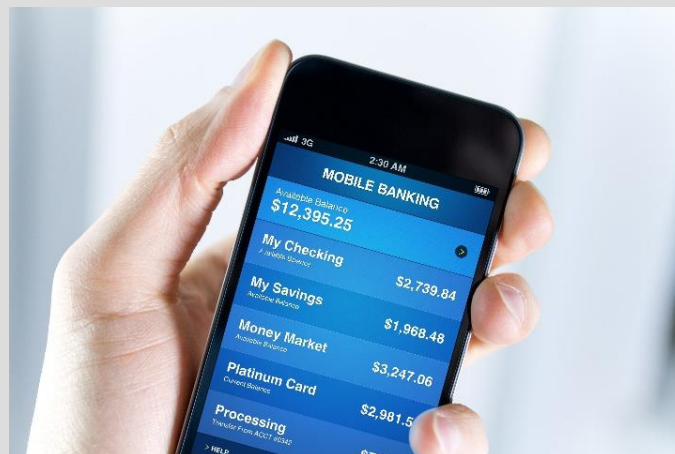

Satellite-based Connectivity

- **High availability dedicated SCPC and shared TDMA VSAT solutions**
 - Star and Mesh configuration
 - Point-to-point or point-to-multipoint connectivity
 - Secured private VPNs
 - MPLS end-to-end over satellite links
- 24x7 NOC, managed services with trouble ticket reporting
- QoS with guaranteed SLAs for response time and bandwidth offered
- Secured (AES 256 encryption)
- Local bank branches backhaul connectivity to the bank headquarter's WAN
- Voice over IP and Video training and surveillance
- Back-up to business continuity: BringCom's Disaster Recovery Solution
- Ubiquitous coverage: expand network reach
- SatCom GSM trailer system: BringCom's Mobile GSM rapid deployment solution for rural banking services
 - Automatic Teller Machines (ATMs) connectivity
 - Smartphone mobile transactions
- Seamless integration with terrestrial networks

Wireless connectivity

- **Fixed broadband Wireless Access**
 - Last-mile and metro-area access
- Point-to-Point line of sight Microwave for backhaul connectivity
- WiFi, WiMax long and short range networks
 - Ideal for connecting remote bank branches to headquarter and ATMs in urban and rural areas
 - Offers broad communications needs
 - Supports video surveillance, security and access sensors
 - Supports banking and smartphones mobile banking applications
- Cellular (2G/3G/4G)
 - Voice and broadband data service

Communications solutions that extend access to the “unbanked” population
