

DJIBOUTI TELEPORT

GATEWAY TO AFRICA AND THE MIDDLE EAST

BringCom's Djibouti Teleport is ideally situated for government agencies and enterprises requiring redundancy or back-up solutions, broadband/mobility/maritime/in-flight connectivity services, and to host a LEO or MEO satellite system's Gateway.

LOCATION > BringCom's 5 acre facility is located on the outskirts of Djibouti City and Djibouti-Ambouli International Airport.

ORBITAL ARC > The teleport can view satellites from 132°East to 47°West.

OPERATIONAL ANTENNAS >

- 2.4m Ku-band on Arabsat Bard-4
- 11m C-band on Intelsat IS-904
- 9m C-band on Thaicom 6 (AFRICOM-1)
- 9m Ku-band on SES NSS-12

Antennas are equipped with tracking equipment and feature 24x7 remote monitoring by BringCom's NOC with in-country personnel.

SPARE ANTENNAS >

- 7.3m Ku-band with a redundant 250W HPA (new tracking system is required)
- 3.8m Ku-band receive only

POWER INFRASTRUCTURE > 1:1 redundant 120 KVA UPS system for critical systems, as well as 1:1 redundant backup generators (250 KVA and 230 KVA) with automatic switching.

TELEPORT SERVICES >

- 24x7 Network Operations Center
- Carrier Monitoring
- Antenna Hosting (C, Ku and Ka-Bands)
- Equipment Co-Location
- Uplink/Downlink
- MPLS, Ethernet, IPLC and IP Connectivity

FIBER CONNECTIVITY > Fiber connectivity through Djibouti teleport includes access to:

- AAE1
- DARE1
- EASSY
- EIG
- SEACOM
- SEA-ME-WE 3
- SEA-ME-WE 5

Submarine-fiber cable systems from the teleport are supported via a redundant fiber ring.

FACILITIES & SECURITY > Fully climate controlled facility with 24x7 controlled access to grounds. Additional security, including video monitoring, is in place for critical systems. MAC III compliant networking solutions.
